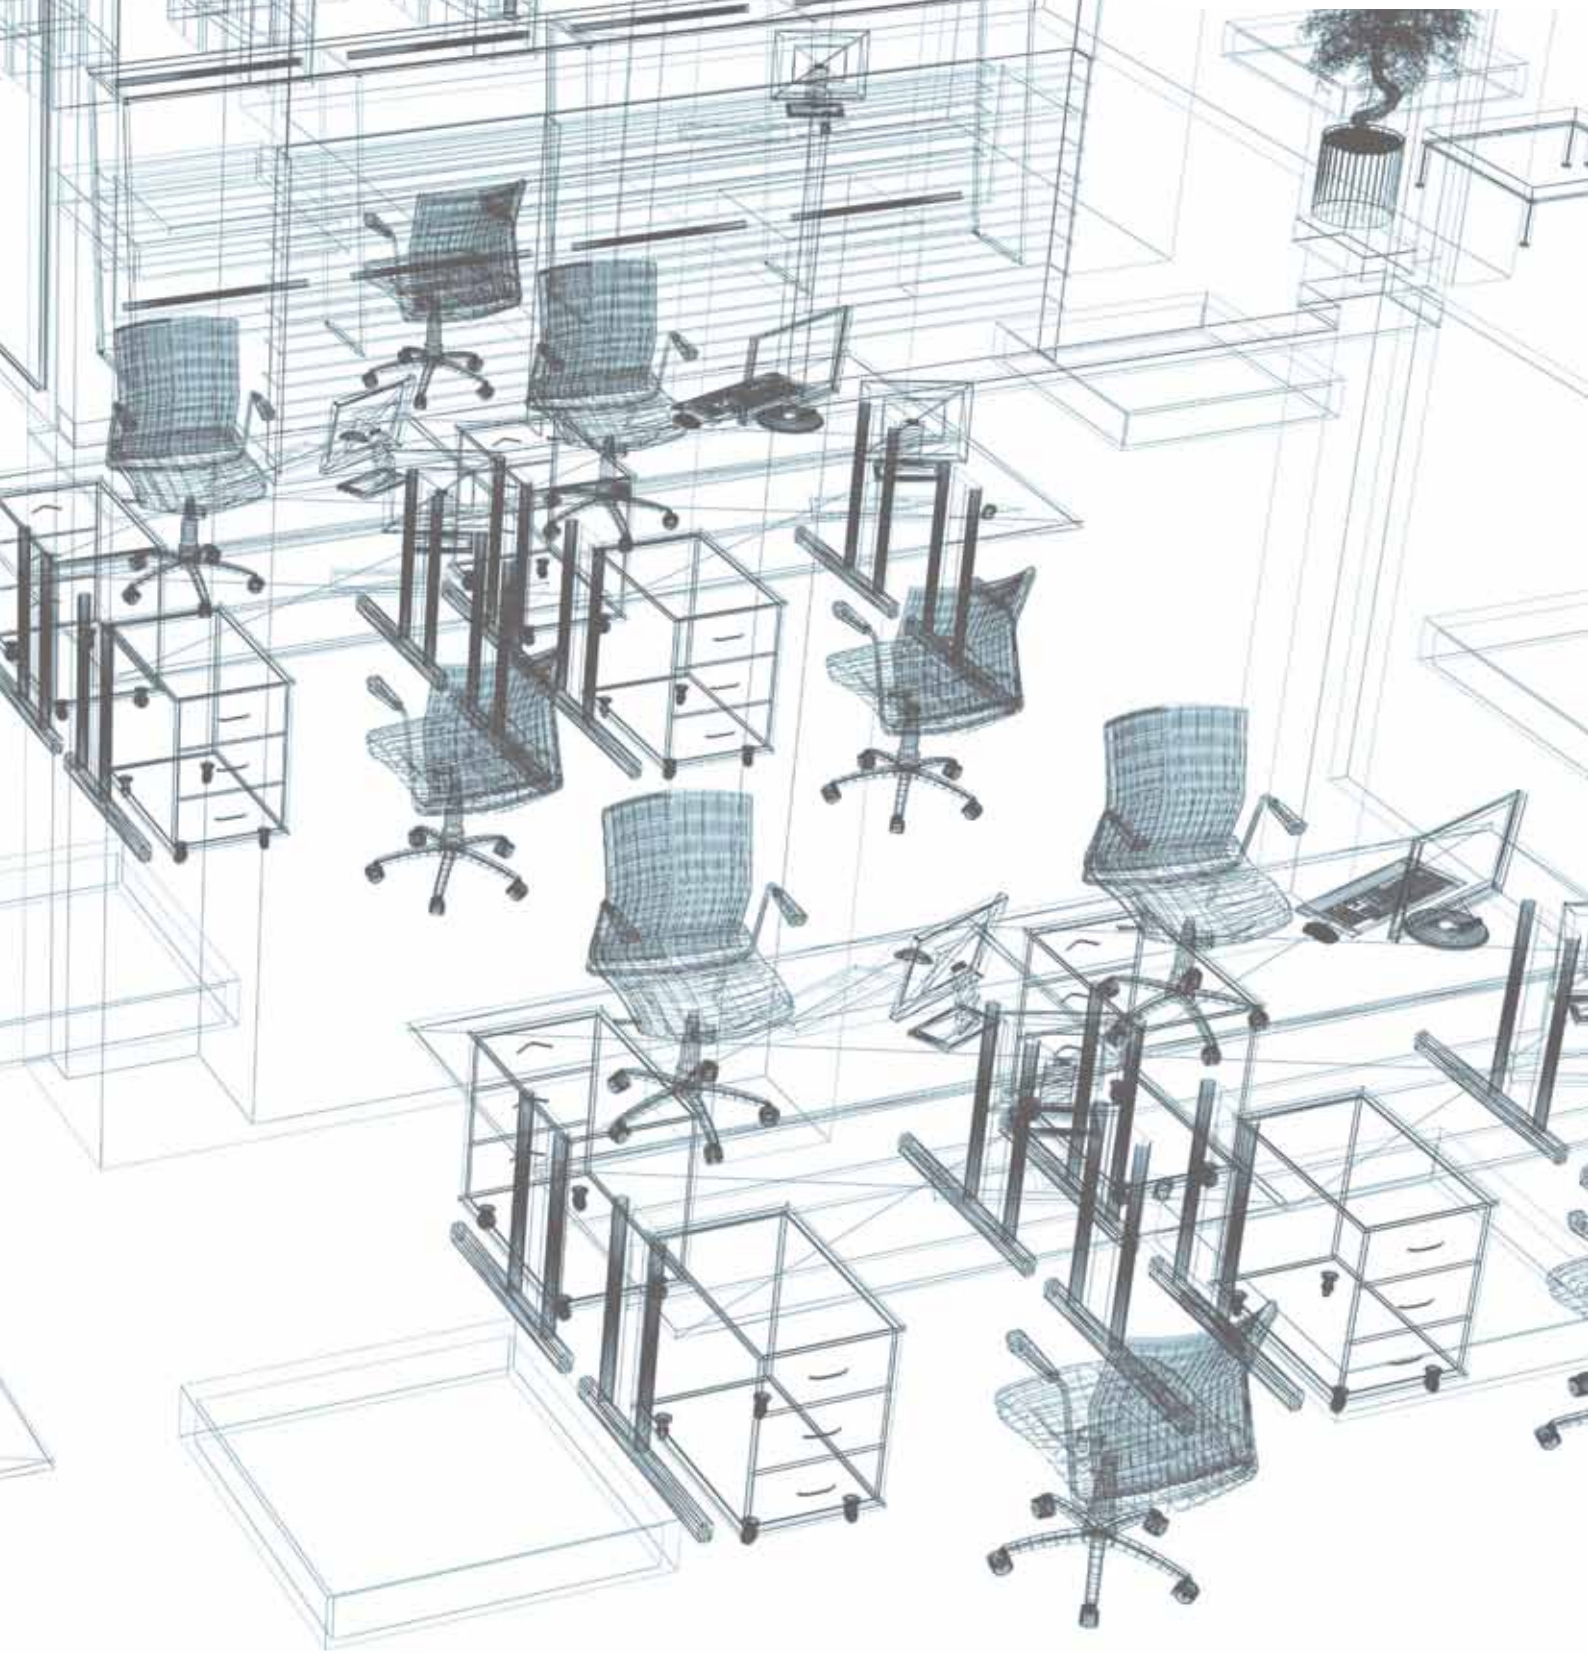
OKI



PRODUCT PORTFOLIO

OKI - The smarter way to print

For over 60 years OKI has been delivering advanced printing solutions worldwide, introducing ground-breaking technologies that have supported the needs of businesses large and small.

From printers to faxes and multifunctional devices to service-led initiatives OKI offers a complete range of fast, high quality, reliable products and innovative services that help to improve business productivity and deliver cost savings and efficiencies.

We have built into our products the tools required to help improve the way micro to large sized businesses manage their documents, inviting them to think differently about their printing and offering them a smarter way to print.

A philosophy that delivers business excellence

We develop and design all our products and services based upon three core principles:

Simple - the device should be easy to use and clean in design to suit today's modern office environments

Solid - the device should be well built, robust and reliable

Smart - the device should include intuitive features to make printing and document management easier

We only design and manufacture printers and devices for the business and public sector communities. They are built to provide the quality, reliability, performance, efficiency and output demanded by today's businesses. Through a process of customer research and feedback we continually adapt our devices to meet the changing needs of modern organisations, the workplace and the environment.

Advanced technology

Whether you are a micro-business or a large corporation, OKI offers you the tools you require to be productive and efficient.

Through advanced digital LED technology, ergonomic design, innovative functionality and credible energy saving features our wide range of devices brings new efficiencies to the workplace, improving document management and reducing costs.

The support we offer to our customers is designed to exceed their expectations, providing them with a local service backed by a global organisation.

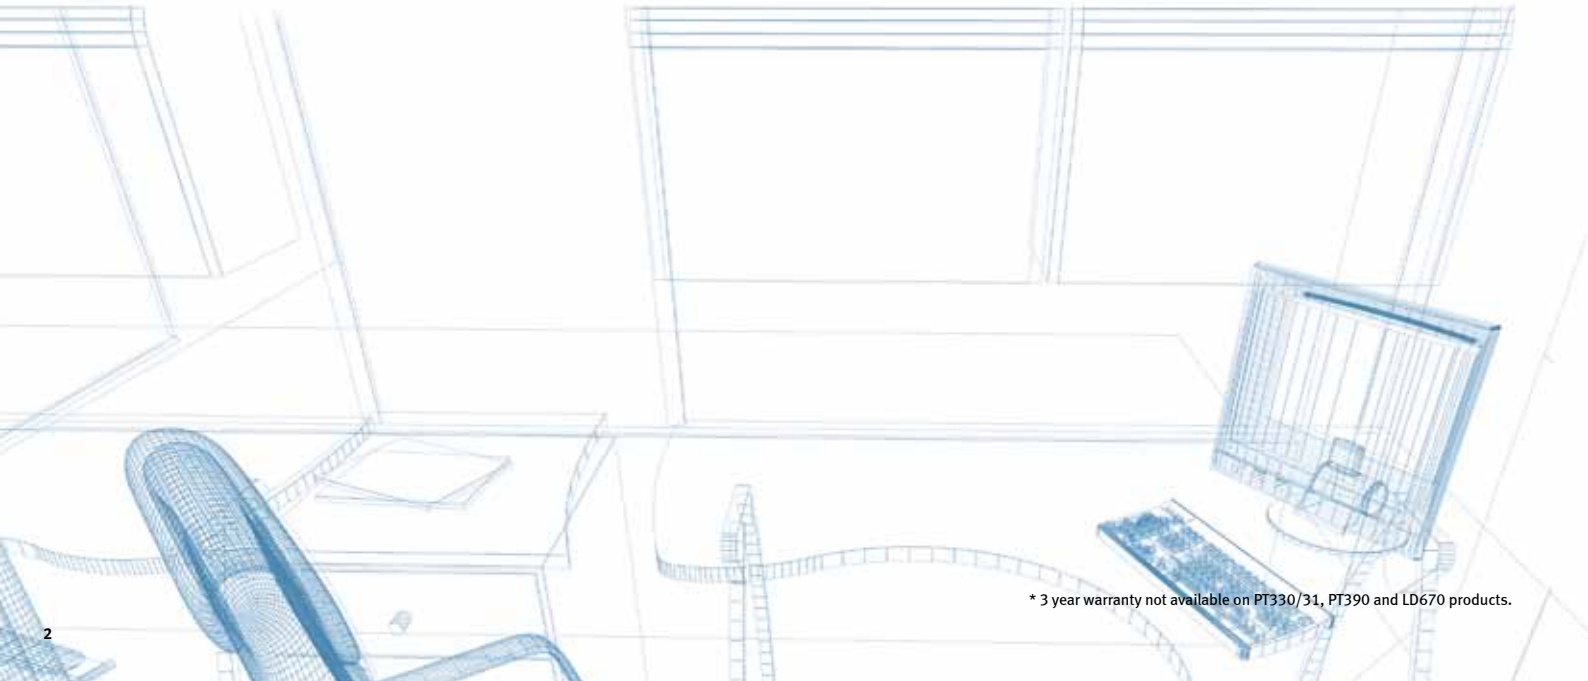
OKI's ultra-reliable, award winning digital LED technology has fewer moving parts, which means less wear and tear, for exceptional reliability. This, plus durable components and a robust, built-to-last design, allows us to provide users with the peace of mind of a 3-year warranty as standard on most models*.

Professional quality output enables in-house printing

OKI's portfolio of products enables businesses to print sharp, clear and vibrant documents in a multitude of different media weights and sizes, in-house. Businesses can now save time, money and hassle by being in control of what they print without having to rely on a professional print house or a high street print shop. This provides complete flexibility whilst reducing lead times and wastage.

Features that minimise environmental impact

OKI devices are designed to reduce an organisation's impact on the environment, whilst also reducing their costs. LED technology is inherently energy efficient and through additional energy saving functions, such as Eco Mode, Power Save, Deep Sleep and Auto-Off modes, we have further reduced the power consumption of our printers. Duplex printing, which is standard on most models, and a range of electronic document management functions help to reduce the amount an organisation needs to print and the paper they use.



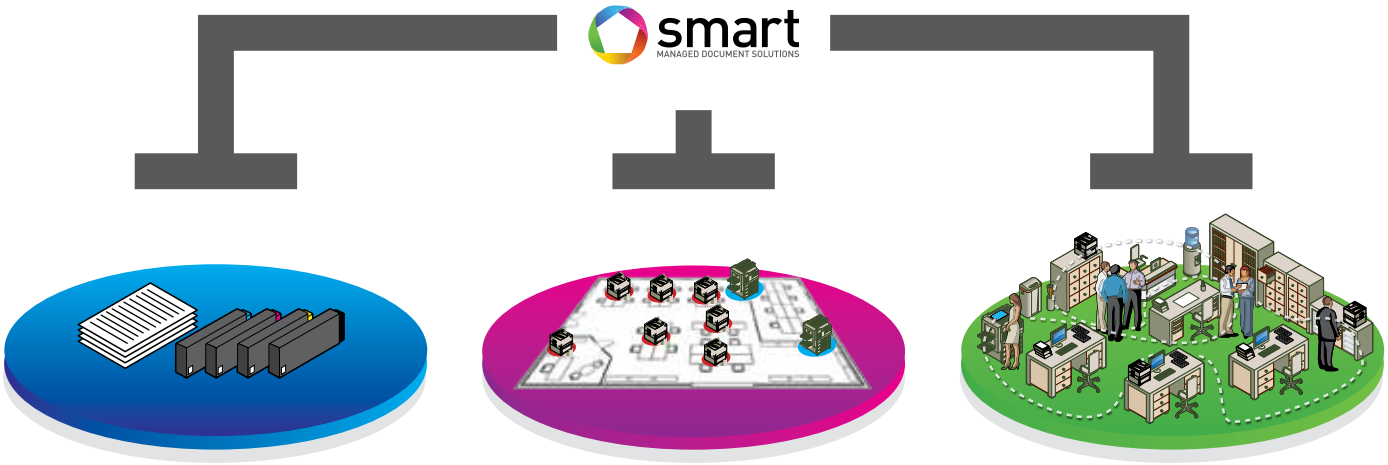
* 3 year warranty not available on PT330/31, PT390 and LD670 products.

Take control of your print and document costs with Smart Managed Document Solutions

To help our customers to tackle the hidden costs associated with printing and document management processes OKI has developed Smart Managed Document Solutions; a portfolio of services that offers a flexible solution for any size of business, allowing you to reduce your hidden costs and improve efficiency within your organisation.

Optimisation of your printer fleet and document workflows is central to Smart Managed Document Solutions. By identifying the right service for your business we aim to reduce your printing costs, improve efficiency and document workflow and provide you with the latest technology to simplify your business processes.

Through a process of consultation and analysis we will identify your printing needs and work with you to recommend a flexible solution that is bespoke to your business.



Managed Page Services
Reducing the total cost of your business printing

Managed Print Services
Optimising and managing your printing needs

Managed Document Services
Optimising and managing document workflow to reduce cost and improve efficiency

Integrated solutions to enhance your print and document workflow

Smart Solutions is an integrated suite of software, technologies and tools developed by OKI or an OKI partner, that enhance the print and document workflow, management and security within your organisation. Through the use of these we are able to extend your document processes, ensuring a fully integrated and optimised solution that meets the needs and objectives of your business whether office based, mobile or in the cloud.

Smart Solutions can be categorised into five key areas:

- **Capture and Distribution** - focuses on the digitisation of documents, converting to paperless workflows with instant electronic access and routing by adding metadata
- **Document and Content Management** - to facilitate access and retrieval of data to improve collaboration and response times
- **Security and Output** - enables costs control and full visibility of print and copy usage
- **Mobility** - print from any company owned device or BYOD to any device
- **Device and Contract Management** - Track device usage remotely

Colour printers

Colour is an effective business tool drawing attention to documents. The OKI A4 colour printer range not only offers superior print quality with ProQ2400 Multi-level technology they also help to improve productivity and reduce printing costs by enabling in-house printing.

Unique to OKI, the entire range offers duplex printing and the ability to print on banners up to 1.3m long and impressive colour print speeds up to 34ppm.

Monochrome printers

Fast, sharp printing and outstanding reliability across the range. Unique to OKI, all models offer automatic duplex printing and the ability to print banners up to 1.3m long and impressive print speeds of up to 52ppm and paper capacity up to 3,160 sheets.

Additional functionality enables businesses to print securely, manage printing by controlling usage and cost, and manage devices across networks.

From micro businesses to large corporations, OKI's monochrome range includes models to suit all, from compact desktop printers to networked workgroup printers.

Mono multifunctional products

Our monochrome multifunctional printers (MFPs) combine printing, copying, scanning, faxing and more to improve document output and efficiency in the workplace.

The MB400 Series desktop MFPs offer print speeds of up to 40ppm and just 5 seconds to first print. Unique to OKI, all MFPs in the range print, scan, copy and fax in duplex making them not only efficient but environmentally friendly as well.

Our MB700 Series are enterprise class A4 MFPs, designed for seamless integration into your document workflow. With print speeds up to 52ppm and paper capacity of 3,160 sheets, these MFPs are designed to improve your business productivity. They come with sXP (smart Extendable Platform), an open platform to help streamline your document intensive business processes.

The MB700 Series feature an easy to use 23cm colour touch screen, high yield cartridges and highest level of document and data security for the enterprise customer. Unique to OKI, the MB700 Series offer convenience stapling as standard.

Speciality Printers

DICOM - Medical Printers

A first in digital printer technology, this range of medical printers combine the cost effectiveness and high quality output of an LED printer with embedded DICOM software, allowing you to print directly from medical equipment without the use of conversion software or external hardware.

You can now print your medical imaging cost effectively on standard media in vibrant, High Definition colour and in sizes up to A3+. From x-rays (eg dental, veterinary, hospital, clinic) nuclear medicine, scans (eg MRI, CT) and ultrasounds, these images can now be easily printed for your own non-diagnostic use or to provide a copy for your patients and clients to take away with them.

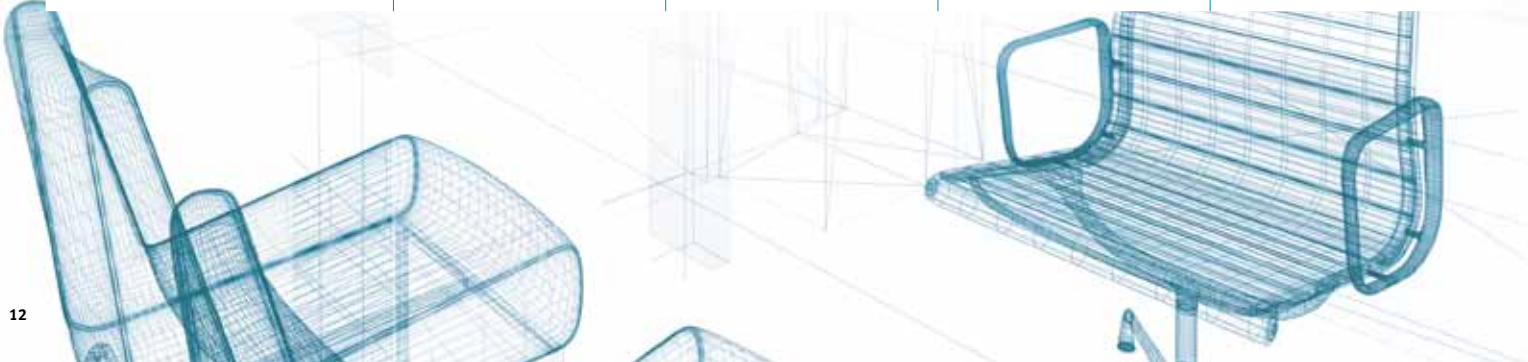

Graphic Arts & Creative Printers

OKI pushes the boundaries of printer innovation with products that are brilliantly designed to meet the specific needs of the graphic arts market.

These production printers provide graphic arts and creative business commercial-grade, high-impact digital colour with unrivalled media flexibility. Our proprietary single-pass digital LED technology enables you to print in-house on a complete range of media sizes from A6 to SRA3 and banners up to 1.3m, with weights of up to 360gsm single sided and 320gsm duplex, heavier than comparable printers.

Print in White & Clear Gloss, in house, on demand at a low cost

OKI is revolutionising digital printing with a number of industry firsts including our white toner portfolio of A3 and A4 printers and our 5 colour (CMYK+ white or clear gloss) digital LED A3 printer series that prints on demand the full range of process colours, with the addition of a fifth spot colour in either white or clear gloss. Previously these processes could only be achieved through the use of expensive digital or lithographic printing equipment. Now it is available to any creative business or reprographics studio...on demand.

SIDM printers

Robust, reliable and highly versatile OKI Dot Matrix printers can be found throughout the world in many mission critical printing applications. Their impact printing technology makes them perfect for multi-part forms printing of purchase orders, dispatch notes, invoices and receipts. 9-pin models provide the optimum speed/quality print performance while 24-pin variants deliver the superior print quality needed for complex characters, very small text and barcodes.

Available in Narrow (A4) and Wide (A3) carriage formats OKI Dot Matrix printers are perfect for a wide range of printing applications including spreadsheets, listings, picking lists and data logs. 24-pin Flatbed models are available for more specialist applications such as printing cheques, tickets, appointment cards and the wide range of small labels used in the healthcare industry.

Thermal POS/ Label printers

The OKI portfolio of Thermal POS/Label printers is perfect for busy, time critical, customer focused environments such as retail, hospitality or customer service. Their compact design and unique front exit paper path mean that they can be placed either on or under the counter, making them suitable for locations where space is at a premium, even in the harshest work environments.
